

# NEMGUARD<sup>®</sup> PCN

MAPP 17922

A granular nematicide formulation containing a minimum of 450 g/kg of garlic extract (CLAIL 0021) for the reduction of potato cysts nematode populations in potato crops.

**NEMguard PCN GRANULES** UFI: DMP4-50TX-800F-KKVV  
A granular nematicide containing a minimum of 450 g/kg of Garlic extract.

## WARNING

**H317 MAY CAUSE AN ALLERGIC SKIN REACTION**  
P261 Avoid breathing dust/fume/gas/mist/vapours/spray.  
P272 Contaminated work clothing should not be allowed out of the workplace.  
P280 Wear protective gloves/protective clothing/eye protection/face protection/hearing protection.

P302 + P352 IF ON SKIN: Wash with plenty of water.  
P333 + P313 If skin irritation or rash occurs: Get medical advice/attention.  
P321 Specific treatment (see Safety Precautions).  
P363 Wash contaminated clothing before reuse.  
P501 Dispose of contents/container to a licensed hazardous waste disposal contractor or collection site except for triple rinsed, empty containers which can be disposed of as non-hazardous waste.  
**EUH208 Contains garlic. May produce an allergic reaction.**  
**EUH401 To avoid risks to human health and the environment, comply with the instructions for use.**

THE (COSHH) CONTROL OF SUBSTANCES HAZARDOUS TO HEALTH REGULATIONS MAY APPLY TO THE USE OF THIS PRODUCT AT WORK.

## SAFETY PRECAUTIONS

### Operator protection

Engineering control of operator exposure must be used where reasonably practicable in addition to the following equipment. WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS), SUITABLE PROTECTIVE GLOVES AND FACE PROTECTION (FACESHIELD) when handling the product. However, engineering controls may replace personal protective equipment if a COSHH assessment shows they provide an equal or higher standard of protection. WHEN USING, DO NOT EAT, DRINK OR SMOKE. WASH HANDS AND EXPOSED SKIN BEFORE MEALS AND AFTER WORK.

### Environmental Protection

Do not contaminate water with the product or its container. Do not clean application equipment near surface water/avoid contamination via drains from roads. Do not apply product through broad-cast equipment.

### Storage and Disposal

KEEP AWAY FROM FOOD, DRINK AND ANIMAL FEEDING STUFFS. KEEP OUT OF REACH OF CHILDREN. KEEP IN ORIGINAL CONTAINER, tightly closed, in a safe place away from damp. EMPTY CONTAINER COMPLETELY and dispose of safely. Use within 24 months from date of manufacture, see date on label.

## DIRECTIONS FOR USE

This information is approved as part of the product label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

A single application of NEMguard PCN granules at the recommended rate and in appropriate conditions may give a reduction of nematode damage but performance can be variable and increases in marketable yield cannot be relied upon.

Apply the granules during final seedbed preparation just before planting. Apply to the soil surface evenly and incorporate to the required depth immediately and ensure even distribution of the granules. Application must be made using an approved applicator correctly calibrated to apply NEMguard PCN Granules at the recommended dose rate.

Apply NEMguard PCN granules if prior to cropping, soil samples reveal that damaging nematodes have reached or exceeded known risk thresholds. Nematodes from the sub-orders: *Dorylaimina* and *Tylenchina* in particular *G. pallida* and *G. rostochiensis* are of particular importance. The effects of this product have only been tested on the species *Globodera pallida*. Consult an expert for interpretation of nematode population data before considering nematicide application.

## APPLICATION RATE AND FREQUENCY

APPLY AT A RATE OF 60 KG/HA ONCE AT DRILLING/SEEDING.  
DO NOT ALLOW THE GRANULES TO BECOME WET OR DAMP BEFORE OR DURING APPLICATION.  
DO NOT ALLOW THE GRANULES TO STAND OVERNIGHT IN THE APPLICATION HOPPER.  
ENSURE THAT THE HOPPER AND ROTORS ARE CLEAN AND DRY BEFORE USE.  
USE HORSTINE OR TECHNEAT ROTORS CALIBRATED FOR NEMGUARD PCN GRANULES.

Application equipment should be calibrated prior to use to ensure accurate dosing and Incorporation.

Efficacy of the product may be reduced in prolonged dry condition and it is not recommended for use in soils with a high silt content. If conditions are dry at application, 20 mm of irrigation should be applied as soon as possible after application. If dry conditions persist, additional regular irrigation should be applied.

## Best conditions for Use

Soil should be considered damp enough to support crop establishment at the time of a NEMguard PCN application. Percolation of water down the soil horizon is required to disperse the actives in NEMguard PCN granules and loss of continuous hydraulic contact down the ridge after application of NEMguard PCN may adversely affect efficacy.

## Compatibility

Do not tank-mix this product.

## Resistance

No special measures are required.

## Company Advisory Information

Nematode damage to potato roots. Nematode damage to potato crop can be evident as irregularities in the consistency of the plant stand, reductions in crop vigour and a range of malformations in the maturing root system. A crop may be affected by all these symptoms over a period of several weeks coinciding with period when PCN eggs hatch and attack the crop. In situations where nematode populations are substantially exceeding damage risk thresholds, NEMguard PCN granules may not produce adequate levels of PCN population suppression.

## CONDITIONS OF SUPPLY

The Seller warrants that the goods shall at the time of delivery to the Buyer conform to the Seller's standard specification but all other conditions and warranties, whether express or implied by the statute or custom of the trade or otherwise and whether as to condition, quality, performance, merchantability, fitness for any purpose or otherwise, are expressly excluded and, subject as aforesaid, the Seller shall be under no liability whatsoever, in contract or in tort, for or in respect of any loss or damage whatsoever resulting from or arising out of the goods or supply of use thereof, whether caused by the negligence of the Seller or otherwise. The Seller shall be under no liability in respect of the warranty given above unless the Buyer allows the Seller reasonable opportunity of inspecting the goods where practicable. A consumers statutory rights are not affected.

## IMPORTANT INFORMATION

FOR USE ONLY AS A PROFESSIONAL NEMATICIDE

Crops	Maximum individual dose	Maximum number of treatments	Latest time of application	Maximum total dose
Potato	60 kg/ha	1 per crop	At drilling, Seeding	60 kg/ha

Other specific restrictions: None

READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE. CONSULT PROCESSOR BEFORE USING ON CROPS GROWN FOR PROCESSING. FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS.
